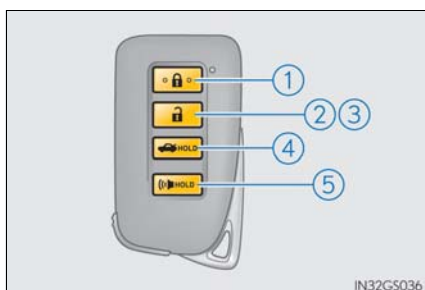
Keys

■Electronic key

Smart access system with push-button start (→P.10)
Wireless remote control (→P.10)

■Mechanical key
To take out the mechanical key, push the release button and take the key out.

Carry the mechanical key together with the electronic key. If the electronic key battery is depleted or the entry function does not operate properly, you will need the mechanical key.

Wireless remote control


① Locks all the doors

② Unlocks all the doors
Pressing the button unlocks the driver's door. Pressing the button again within 5 seconds unlocks the other doors.

③ Opens the windows and moon roof (press and hold)*

④ Opens the trunk (press and hold)
If the vehicle is equipped with a power trunk opener and closer, the trunk lid automatically opens fully.

⑤ Sounds the alarm (press and hold)

*: This setting must be customized at your Lexus dealer.

Smart Access System with Push-button Start

The following operations can be performed simply by carrying the electronic key on your person, for example in your pocket. (The driver should always carry the electronic key.) For details on starting the engine, see page 15.

Entering the vehicle
Grip the driver's door handle to unlock the door. Grip the passenger's door handle to unlock all the doors.

Make sure to touch the sensor on the back of the handle.

The doors cannot be unlocked for 3 seconds after the doors are locked.

■ Exiting the vehicle
Touch the lock sensor (the indentation on the upper part of the door handle) to lock all the doors.

■ Opening the trunk
Press the button.

If the vehicle is equipped with power trunk opener and closer, the trunk lid automatically opens fully.

For details on what to do when the electronic key does not operate properly, see page 91.

Theft Deterrent System

■ Engine immobilizer system
The indicator light flashes after the engine switch has been turned off to indicate that the system is operating.
The indicator light stops flashing after the engine switch has been turned to ACCESSORY or IGNITION ON mode to indicate that the system has been canceled.

■ Alarm

The alarm uses light and sound to give an alert when an intrusion is detected.

To set the alarm:
Close the doors, trunk and hood, and lock all the doors. The system will be set automatically after 30 seconds.
The indicator light changes from being on to flashing when the system is set.

To deactivate or stop the alarm:
- Unlock the doors or open the trunk.
- Turn the engine switch to ACCESSORY or IGNITION ON mode, or start the engine. (The alarm will be deactivated or stopped after a few seconds.)

Front Seats

■ Adjustment procedure

Type A
Type B
Type C
① Seat position adjustment switch

② Seatback angle adjustment switch

③ Seat cushion (front) angle adjustment switch

④ Vertical height adjustment switch

⑤ Seatback upper angle adjustment switch (if equipped)

⑥ Lumbar support adjustment switch

⑦ Pelvic support adjustment switch (if equipped)

⑧ Seat cushion length adjustment switch (if equipped)

⑨ Seatback side support adjustment switch (if equipped)

Driving Position Memory

Your preferred driving position (the position of the driver's seat, steering wheel and outside rear view mirrors) can be memorized and recalled by pressing a button.
The same buttons are found on the front passenger's side, allowing the position of the front passenger's seat to be memorized (if equipped).

■ Entering a position to memory

1. Adjust the driver's seat, steering wheel, and outside rear view mirrors to the desired positions. (When memorizing the front passenger's seat, adjust the front passenger's seat to the desired positions.)
2. While pressing the "SET" button, or within 3 seconds after the "SET" button is pressed, press button "1", "2" or "3" until the signal beeps.
If the selected button has already been preset, the previously recorded position will be overwritten.

■ Recalling the memorized position
Press button "1", "2" or "3" to recall the desired position.

■ Linking driving position memory with door unlock operation (driver's side only)
While pressing the button to recall the position, press the driver's door lock switch (either lock or unlock) until the signal beeps.
The driving position is recalled when the driver's door is unlocked using the entry function or wireless remote control and the driver's door is opened.
